

Georgia Cyber Range

The Georgia Cyber Range is a private cloud computing environment hosted at the Georgia Cyber Center.

We provide an immersive live fire cyber range experience, allowing extensive capabilities supporting both research and training. We go beyond simple simulations, through deploying automated, reliable, and repeatable environments including common web applications, end-user systems, small business & enterprise services, along with the ability to customize and duplicate your organizations network environments (Digital Twins).

Services

Educational Training Environments

- Simple Web Access
- Single/Multi System environments
- Zero Touch Provisioning

Event Hosting

- Capture The Flag (CTF)
- Red v. Blue

Research Environments

- Cloud, Security, Scientific and Medical Device Research

Reliable, Scalable, and Repeatable environments to fit any need
